

Highest quality anti-seize

RM Anti-Seize is a top quality anti-seize with superior de-oxidation, penetration and lubrication properties. Once applied, machinery can be heated to improve penetration. Possibly the best anti-seize on the market.

- a powerful cleaner that dissolves rust/oxidation and dirt
- its penetrating components can reach difficult access areas
- lubricates with incredible efficiency to eliminate unwanted friction and prevent stiffness or seizing
- once applied, parts can be heated gently to improve penetration of the product without evaporation.
- universal lubricant
- in some cases, this product may be used as a lubricant if RM Lubrispray is not available; though this is not its intended function.

Instructions for Use:

Apply directly and allow sufficient time (will vary according to the degree of deterioration) for the product to penetrate and act in the parts or machinery.

Technical characteristics:

Lubricant characteristics	Norm	Value
Colour	Visual	Beige
Aspect	Visual	B and T
Viscosity, cSt at 40° C	ASTM D-445	39
Density at 15° C	ASTM D-1298	1,02
Fire point, °C	ASTM D-92	179
Freezing point, °C	ASTM D-97	-7

Aerosol Characteristic

Fire point, °C	ASTM D-92	-43
Pressure of contents, bars		3,7

Packaging references:

RM 0009 00400: 400 ml metallic container / aerosol

Recycle containers according to applicable legislation.
