

# RM Injection Care diesel

## Injection systems protector

**RM Injection Care diesel** is an excellent injection systems protector. Created with the latest market technologies, it significantly improves fuel properties and overall system performance. **RM Injection Care diesel** eliminates water condensation and cleans injector nozzles, filters, etc., providing superb lubrication power. Protects the combustion chamber from wear, improves engine performance and reduces black smoke and excess consumption.

- powerfully cleans and protects injection systems
- prevents carbonization in injector nozzles, pistons and valves
- optimizes consumption and emissions
- restores power lost from blocked injectors
- can be used in all types of motors, including Euro 5 and Euro 6, where other additives do not work
- excellent performance in all injection systems, including common rail
- outstanding protection against corrosion
- eliminates water condensation and fuel deposits
- keeps the fuel filter clean and extends its useful life
- lubricates and reduces wear in the combustion chamber
- improves cetane index and facilitates cold start
- regular use of **RM Injection Care diesel** keeps the combustion chamber and the injectors in optimal condition and extends the useful life of post-combustion components (turbo, EGR valves, catalysts and particle filters)

### Dosage for deep cleaning:

Add the entire container contents (150 ml) to 40 litres of fuel. Repeat every 10.000 km.

For industrial vehicles, add 1 litre to every 250 litres of fuel.

### Dosage for preventive maintenance:

For industrial vehicles add 1 litre to every 2000 litres of fuel.

For severe cases, use deep cleaning dosage. Moderate overdose is not harmful.

### Technical characteristics:

Viscosity, cSt a 40 °C	ASTM-D-445	12,6
Flame point, °C	ASTM-D-92	108
Density a 15°C, g/ml	ASTM-D-1298	0,93
Freezing point, °C	ASTM-D-5950	- 43
Physical state		liquid
Colour		pale yellow
Odour		characteristic
